## SUMMARY

Computer Science undergraduate skilled in **Full-Stack Development**, building scalable web applications, real-time systems, and microservices using technologies such as Docker, Redis, Apache Kafka, and AI integrations. Seeking a Software Development internship to contribute to building scalable software systems while strengthening engineering and problem-solving skills.

## TECHNICAL SKILLS

**Programming Languages:** Java, JavaScript, TypeScript

**Frontend:** Next.js, React.js, Tailwind CSS, Shaden UI, Context API, Zustand, Redux Toolkit

**Backend:** Node.js, Express.js, REST APIs, JWT Authentication, Socket.IO

**Databases & Caching:** MongoDB, Mongoose, PostgreSQL (Neon), Redis

**Cloud & DevOps:** Docker, Docker Compose, Vercel, Render, Cloudinary

**Tools & Integrations:** Apache Kafka, Google Gemini AI, Razorpay, Twilio, Git, GitHub

## EXPERIENCE

### GirlScript Summer of Code

July 2025 – October 2025

Open Source Contributor

Remote

- Successfully merged **39 pull requests** across multiple open-source repositories, contributing to feature development, bug fixes, and platform enhancements.
- Developed and delivered key features including **Certificates modules, Projects Gallery modules, and GitHub API integrations**, improving functionality and developer experience.
- Enhanced **UI/UX, responsiveness, and accessibility** using React.js, JavaScript, and Tailwind CSS across community-driven projects.

## PROJECTS

### Chatify – Real-Time Scalable Chat Application | [GitHub](#) | [Live](#)

- Developed a **production-ready real-time chat application** using the **MERN stack** and **Socket.IO**, enabling instant messaging, user presence tracking, and real-time communication through a **scalable backend architecture**.
- Implemented **backend performance optimizations** including **cursor-based pagination, MongoDB indexing, and Redis-based rate limiting** to improve query efficiency, reduce response latency, and protect APIs from abuse.
- **Tech Stack:** MongoDB, Express.js, React.js, Node.js, Socket.IO, Redis, Zustand, JWT, Tailwind CSS

### HireNode – AI-Powered Hiring Platform | [GitHub](#)

- Built an **AI-powered hiring platform** enabling job posting, application tracking, resume management, company onboarding, and subscription-based recruitment through a scalable microservices architecture.
- Designed and developed **five independent microservices** (Auth, User, Job, Payment, and Utils), integrated Google Gemini AI for ATS resume analysis and career recommendations, utilized Apache Kafka for asynchronous email notifications, and containerized the entire system using Docker and Docker Compose.
- **Tech Stack:** Next.js, React.js, TypeScript, Node.js, Express.js, PostgreSQL (Neon), Redis, Context API, Apache Kafka, Docker, Google Gemini AI, Cloudinary, Razorpay

### DigiiQ – Real-Time B2B Queue Management SaaS | [GitHub](#) | [Live](#)

- Built a **real-time queue management SaaS platform** where organizations (hospitals, banks, clinics) can create and manage service queues digitally, generate virtual tokens, and eliminate physical waiting lines through live queue orchestration.
- Implemented **Socket.io based real-time updates**, customers can join queues remotely, track their live position, view estimated wait times, and receive instant status updates as organizations manage queue progression through a dynamic dashboard.
- **Tech Stack:** Next.js, TypeScript, Node.js, Express.js, MongoDB, Mongoose, Socket.io, Zustand, JWT

## EDUCATION

Guru Nanak Dev University, Amritsar

B.Tech - Computer Science and Engineering - **CGPA - 7.55**

2024 – 2028

Amritsar, Punjab
